## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rohde.

Rohde discloses a connector (title), comprising: a first housing defining a through hole (unnumbered figure 1 Phillips head screws); a second housing having a threaded post (unnumbered figure 3 near 46); a screw passing through the through hole (unnumbered fig. 1 again) and fastening to the threaded post; and a resilient lever (30) having a hook (40) for sustaining a pulling force (fig. 5), rotatably connected to the threaded post (fig. 3) so that pulling force is substantially directed to the threaded post.

Regarding claim 2 Rohde discloses that a key (32) contacts the resilient lever, the resilient lever rotated by the threaded post when the key is pushed (claim 4 lines

**27-34). This claim can now be rejected because of the applicant's satisfaction of the 112 rejection of the first office action.**

***Response to Arguments***

3. Applicant's arguments filed 1/5/05 have been fully considered but they are not persuasive.

The threaded post and screw of Rohde has to experience a pulling force since it is the fulcrum and the prime support for the lever.

***Allowable Subject Matter***

4. Claims 6-8 are allowed over the prior art of record.

5. Claims 3-5 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: Regarding claim 3 the pressing portion, curved portion and their interrelationship when the key is pushed. The reasons for allowance of claims 6 and 7 were given in the first office action.

*Conclusion*

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Weber, Clement and Fritz all show a resilient lever that imparts a pulling force with a hook but no separate key.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Zarroli whose telephone number is 571-272-2101. The examiner can normally be reached on 7:30 to 3:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, T.C. Patel can be reached on (571) 272-2800 ext 39. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
